(11) General Instrument DRC-400/425

UNIVERSAL REMOTE CONTROL

USER GUIDE

OVERVIEW

The General Instrument DRC Universal Remote Control will control up to four devices, including GI Cable Converters (i.e., DCT-1000, DCT-1200, DCT-2000, and DCT-5000), most TVs and VCRs, and auxiliary components.

The DRC requires two fresh AA alkaline batteries and easy programming to control all functions of your Cable Converter, as well as all of the basic functions of your other original remote controls.

For best results, please read and perform all instructions listed here. Also, keep these instructions for future reference.

FEATURES AND FUNCTIONS

Use the DRC mode keys (i.e., AUX, VCR, CABLE, or TV) to control a desired device. When pressed, the selected mode key will light, confirming your choice. Use the other keys to perform desired actions (see the following key chart).

NOTE: The selected mode will remain active until you press another mode key.

AUX VCR CABLE

Press AUX, VCR, CABLE, or TV once to select a home entertainment component to control.

Press HELP once to HELP display the help screen.

Use PAGE ▲ (or PAGE **▼**) to page up (or down) through menu screens and the program guide.

O or O Use LOCK/PPV* to restrict viewing of selected programs or to view the PPV menu.

EXIT Use EXIT to exit menu or guide.

Use INFO to display current channel and program information.

PAGE

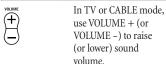

Use cursor keys to move the cursor in the program guide and menu screens.

Use OK/SELECT* to select menu options, PPV events, and to tune programs from the program guide.

GUIDE Use GUIDE to display the program guide.

MENU Use MENU to display the main menu.

Use CHANNEL + (or CHANNEL -) to select the next higher (or lower) channel.

Use LAST to recall last (AST channel or go back one screen in the menu.

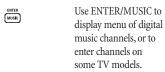

In the CABLE mode, press FAVORITE once to display preset favorite cable channels

These functions are set by your cable system operator.

Use the keypad $(0 \sim 9)$ (1) (2) (3) to directly select 4 5 6 channels (e.g., 09 or 31). 7 8 9 0

FAVORITE

Press TV/VCR BYPASS once to switch VCR to view TV or tape (not supported by all applications).

 \bigcirc

PROGRAMMING VCR CONTROL

- Turn on your VCR and insert a video cassette.
- On the DRC, press and hold VCR (at least 6 seconds) until you see the programming mode start. Each of the mode key lights will turn off and on sequentially, starting with AUX on through TV, and the sequence will repeat twice. During this time, release VCR and wait until it's lit continuously

- Locate your VCR brand in the SETUP CODES FOR VCRs below. Brands are listed in alphabetical order with the most popular codes listed first.
- Enter the first four-digit VCR code for your VCR. If you perform this procedure correctly, the VCR light will blink three times.

NOTE: If you enter an invalid code, the VCR light will turn off. In that case, repeat steps 2 through 4 with a valid

Aim the DRC at your TV and and press POWER once. Your VCR should turn off. If your VCR remote control does not have a POWER key, press PLAY. If it does not respond, repeat steps 2-4, trying each code listed for your brand until you find the one that operates your VCR. If your VCR still does not work with the DRC, try searching for the code (see Searching For Your Code on the back side).

Write your VCR code in the boxes below for future reference.

NOTE: Remember, to use the DRC to operate your VCR, press VCR first.

NOTE: Some TV/VCR Combo codes may require a separate TV code to control volume. Check the codes above and follow the instructions in the "Programming TV Control" section (on the front side) using the supplied TV code. If there is no TV code listed for your TV/VCR Combo's operating code, you will need to use the volume control capabilities of your General Instrument Cable Converter.

PROGRAMMING CABLE CON-**VERTER (OR DBS) CONTROL**

instructions (otherwise skip to the next

topic):

When you received your DRC remote control, it was already programmed to operate your GI Cable Converter. However, if you want to control a DBS receiver or a different Cable Converter, perform the following

- 1. Turn on the Cable Converter or DBS Receiver.
- On the DRC, press and hold CABLE (at least 6 seconds) until you see the programming mode start. Each of the mode key lights will turn off and on sequentially, starting with AUX on through TV, and the sequence will repeat twice. During this time, release CABLE and wait until it's lit continuously
- Locate your Cable Converter or DBS brand in the SETUP CODES FOR CABLE CONVERTERs or SETUP CODES FOR DBSs below. Brands are listed in alphabetical order with the most popular codes listed first.
- Enter the first four-digit code for your Cable Converter or DBS.If you perform this procedure correctly, the CABLE light will blink three
 - NOTE: If you enter an invalid code, the CABLE light will turn off. Repeat steps 2 through 4 with a valid code.
- Aim the DRC at your Cable Converter or DBS Receiver and and press POWER once. Your Cable Converter or DBS receiver should turn off. If it does not respond, repeat steps 2-4, trying each code listed for your brand until you find the one that operates your Cable Converter or DBS Receiver. If your unit still does not work with the DRC, try searching for the code (see Searching For Your
- Write down the Cable Converter or DBS Receiver code in the boxes below for future reference

ocion for ratare references				

NOTE: Remember, to use your DRC to operate your Cable Converter or DBS Receiver, press

Setup Codes for Cable Converters:

General Instrument	0100, 0101, 0102, 0103, 0104, 0105 0106, 0107
Primestar	0100 0101 0102 0103

PROGRAMMING AUXILIARY COMPONENT CONTROL

To program the DRC to control an auxiliary component (e.g., a second TV or VCR, a GI DBS Receiver, or Digital Audio Tuner):

- 1. Turn on your auxiliary component (and if it's a VCR, insert a video cas-
- On the DRC, press and hold AUX (at least 6 seconds) until you see the programming mode start. Each of the mode key lights will turn off and on sequentially, starting with AUX on through TV, and the sequence will repeat twice. During this time, release AUX and wait until it's lit continuously.
- Locate the brand in the SETUP CODES listed for your type of auxiliary unit (e.g., VCRs, TVs, Cable Controllers, or DBS Receivers) or audio service listed below. Brands are listed in alphabetical order with the most popular codes listed first.
- Press AUX, VCR, CABLE, or TV once to let the DRC know what type of device you want to assign to the AUX
- Enter the first four-digit code for your auxiliary component. If you perform this procedure correctly, the AUX light will blink three times.
 - NOTE: If you enter an invalid code, the AUX light will turn off. In that case, repeat steps 2 through 5 with a valid
- Aim the DRC at your auxiliary component and press POWER once (or PLAY once if it's a VCR). The device should turn off (or start playing the tape). If the auxiliary component does not respond, repeat steps 2-6, trying each code listed for your brand until you find the one that operates your auxiliary component. If it still does not work with the DRC, try searching for the code (see Searching For Your Code).
- Write down the auxiliary component type and its code in the spaces below for future reference.

TYPE:	 	

NOTE: Remember, to use the DRC to operate your auxiliary component, press AUX first.

Scientific Atlanta	0202

SEARCHING FOR YOUR CODE

If your TV, VCR, Cable Converter or Auxiliary Component does not respond to the DRC after trying all of the codes listed for your brand, or if your brand is not listed at all, try searching for your code.

For example, after trying all of the codes for your TV, you still cannot get the DRC to operate your TV, then:

- 1. Turn on your TV.
- 2. On the DRC, press and hold TV (at least 6 seconds) until you see the programming mode start. Each of the mode key lights will turn off and on sequentially, starting with AUX on through TV, and the sequence will repeat twice. During this time, release TV and wait until it's lit continuously.
- Press the ▲ (UP) cursor key once to start the search mode.
- NOTE: In the search mode, the DRC will send IR codes from its library to the selected component, starting with the most popular codes first. When the component responds to a subsequent key command (e.g., POWER), the correct device code will be found.
- Press POWER once. The TV key will light on and off, showing that an IR code has been sent.
- 5. If your television does not turn off, press the UP cursor key once again to call up the next IR code and press POWER once again.
- If your television still does not turn off, repeat step 5 as many times as needed until your TV turns off.
- When your television does turn off, a working code has been found. Press OK once to save the code and the TV kev will blink three times, confirming the selection.
- 8. To search for the codes of your other components, repeat steps 1 through 7, but substitute the appropriate device key (i.e., VCR, CABLE, or AUX) for the component you are searching for.

CHECKING THE CODES

If you have set up the DRC using the Searching For Your Code procedure, you may need to find out which four-digit code is operating your equipment.

Perform the following procedure after you have set up your components to find out which four-digit code is operating your equipment.

For example, to find out which code is operating your TV:

- 1. Turn on your TV.
- On the DRC, press and hold TV (at least 6 seconds) until you see the mode light sequence start. Each of the mode key lights will turn off and on sequentially, starting with AUX on through TV, and will repeat twice. During the sequence, release the TV key and wait until it stays lit continu-
- Press 9 9 0. The TV key will blink three times.
- To view the code for the first digit, press and release 1. Count the number of TV key blinks (e.g., 3 blinks = 3) and write down the number in the leftmost box below.

NOTE: The mode key will not blink if the code digit is a "0".

TV			
	1	1 [

- Repeat step 4 three more times for each successive digit by pressing and releasing 2, 3, and then 4. Finish writing down the code in the boxes above.
- To check for the codes of your other components, repeat steps 1 through 5, only substitute the appropriate device key (i.e., VCR, CABLE, or AUX) for the component you are checking. Write down the codes in the boxes below.

CHANGING VOLUME LOCK

Your new DRC is set to control volume of a component through its associated mode (i.e., through the cable in the Cable mode, through the TV in the TV mode, and through the auxiliary device in the Aux. mode). If your TV is not remote controllable, or if you would like the volume to be controlled by a different component, you can change the Volume Lock setting to control a volume through a non-associated mode (e.g., through the cable in the TV mode).

Changing the Volume Lock setting to the Cable or TV mode will change the volume control for all modes except Aux., which will continue to control its own volume. If you change the Volume Lock setting to the Aux.mode, all modes (i.e., Aux., Cable, and TV) will be controlled by the Aux.mode.

NOTE: The volume controls will not operate if Volume Lock is set to VCR mode.

To change the Volume Lock setting to the TV mode:

- 1. On the DRC, press and hold TV (at least 6 seconds) until you see the programming mode start. Each of the mode key lights will turn off and on sequentially, starting with AUX on through TV, and the sequence will repeat twice. During this time, release TV and wait until it's lit continuously.
- Press and release VOLUME +.
- The TV key light will blink three times, indicating volume has been locked to the TV mode.
- Now, whenever you press VOLUME +, VOLUME -, or MUTE on the DRC, volume will be controlled by your TV.

To change the Volume Lock setting to the CABLE mode:

- 1. On the DRC, press and hold CABLE (at least 6 seconds) until you see the programming mode start. Each of the mode key lights will turn off and on sequentially, starting with AUX on through TV, and the sequence will repeat twice. During this time, release CABLE and wait until it's lit continuously.
- Press and release VOLUME +.
- The CABLE key light will blink three times, indicating volume has been locked to the CABLE mode.
- Now, whenever you press VOLUME +, VOLUME -, or MUTE on the DRC, volume will be controlled by your Cable Converter.

To change the Volume Lock setting to the AUX mode:

- 1. On the DRC, press and hold AUX (at least 6 seconds) until you see the programming mode start. Each of the mode key lights will turn off and on sequentially, starting with AUX on through TV, and the sequence will repeat twice. During this time, release AUX and wait until it's lit continuously.
- 2. Press and release VOLUME +.
- The AUX key light will blink three times, indicating volume has been locked to the AUX mode.
- Now, whenever you press VOLUME +, VOLUME -, or MUTE on the DRC, volume will be controlled by your Auxiliary Device.

To unlock Volume Lock:

- On the DRC, press and hold a mode key (at least 6 seconds) until you see the programming mode start. Each mode key light will turn off and on sequentially, starting with AUX on through TV, and the sequence will repeat twice. During this time, release the mode key and wait until it's lit continuously.
- Press and release VOLUME -.
- The mode key light will blink three times, indicating volume has been unlocked for the selected mode.
- 4. Now, whenever you press VOLUME +, VOLUME -, or MUTE on the DRC, the volume controls will reset to their original device.

TROUBLESHOOTING

PROBLEM: A mode key does not blink or blinks 2 times when you press a key.

SOLUTION: Replace the batteries with two (2) new AA alkaline batteries.

PROBLEM: A mode key blinks when you press a key, but home entertainment component does not respond.

SOLUTION: Make sure the DRC is aimed at your home entertainment component and is not farther than 15 feet away.

PROBLEM: DRC does not control home entertainment components or commands are not working properly.

> **SOLUTION:** Try all listed codes for the component brands being set up. Make sure they can be operated with an

> > infrared remote control.

PROBLEM: TV/VCR combo does not respond properly.

SOLUTION: Use the VCR codes for your brand. Some combo units may require both a

TV code and a VCR code for full operation. **PROBLEM:** No volume on a 2nd TV.

SOLUTION: Follow instructions in Changing Volume Lock.

PROBLEM: CHANNEL+, CHANNEL-, and LAST

do not work for your RCA

1987), only the original remote control will oper-

ate these functions.

PROBLEM: Changing channels does not work properly.

SOLUTION: Due to RCA design (1983-

SOLUTION: If original remote control required pressing ENTER to change channels, press ENTER on the DRC after entering the channel number.

ADDITIONAL INFORMATION

The GI DRC does not have any user serviceable parts. Opening the case, except for the battery cover, may cause permanent damage to your GI remote control.
