

DTA Installation Guide

Thank you for choosing Hood Canal Communications for your TV service. Please enjoy your new all-digital service.

DTA Set-Up Instructions

1. Plug power supply in to back of DTA
2. Unscrew coax from back of TV set, then screw coax on to **cable in** on back of DTA
3. For best picture quality, use HDMI cord between DTA and TV set as illustrated inside this manual
4. For TVs without HDMI connections, use coax connection as illustrated inside this manual
5. See remote instructions to program it to operate TV set

For additional assistance call 360.898.2481

DTA SET-UP OPTIONS

HDMI TVs

best picture quality
using HDMI connection

Back of DTA

↑
insert
power
cord
here

When using HDMI
connection be sure to use
the same TV input
(source) that the HDMI
cable is connected to.

Back of TV

NON-HDMI TVs

better picture quality
using coax connection

Back of DTA

↑
insert
power
cord
here

When using coax
connection, be sure to use
the same channel number
on your TV as the channel
setting on the back of DTA
(channel 4 is selected in
picture above).
