

# HCC Bits & Bytes

## DTAs Available Now

Digital terminal adapters (DTA) are available now! HCC has begun deploying DTAs for all cable subscribers. The DTAs allow HCC to broadcast the basic cable lineup in an all-digital format. This means an improved digital picture quality on all channels, and as an added bonus some local Seattle Networks will be in HD.

The good news is that the DTAs are small, inconspicuous, and have new features. One new feature is the convenient and modern onscreen guide. DTAs are also HD compatible with an HDMI output offering the highest quality connection on cable TV equipment. An HCC branded universal remote control will be provided with each DTA. The simplified remote features RF technology and the ability to control your TV set. That means the DTA can be tucked away behind your TV (or put into an entertainment center) while ensuring the remote will still work!

Broadcasting in all digital will allow HCC to discontinue broadcasting analog channels on the cable system. This frees up valuable space to be used for new services and features. As video service is evolving, customers are demanding a more interactive experience and a broader selection. Newer video technology requires faster Internet speeds because they use more data. Going all digital is the first step towards a better video and internet experience for HCC customers.

As a special bonus, DTAs will be offered at no charge until the basic cable lineup has been fully converted to an all-digital platform. After the conversion there will be a nominal fee for some DTAs. Basic cable customers will receive one complimentary DTA with additional ones being available for \$2.99 per month. Preferred cable customers will be billed for each DTA that they request.

To get a better picture and the onscreen guide get your DTAs today at either HCC location.
